## Installation Requirements

- "1. Installation and connection of your Zip HydroTap must be carried out by a qualified person, observing national and local regulations.
- 2. You will require suitable mains electrical and drinking water connections, plus waste water drainage all within 1.5 metres of the product.
- 3. HydroTap is air-cooled so discrete cabinetry cut-outs are required for ventilation.
- 4. Installation on most bench tops is straightforward however some stone bench tops may require a specialised cutting service.
- 5. If you live in a hard water area, we recommend installation of a Zip scale filtration kit.
- 6. Installation by Zip Professional Service can be arranged with a phone call or through www.zipwater.com"
